### PROFESSIONAL INSTALLATION

The best films require the best technicians. LLumar authorized dealers are carefully selected by the manufacturer for their commitment to providing professional quality installations and customer service. LLumar dealers are factory-trained to install LLumar safety and security film to achieve maximum performance. LLumar's durable, scratch-resistant surface is easy to clean and maintain and carries a factory-backed warranty.

Dealer's Stamp:

## THE WORLD'S NUMBER 1 WINDOW FILM

LOOK FOR THE ADVANTAGE

[www.LLumar.co.za](http://www.LLumar.co.za)

# LLumar provides clear, constant protection against the unexpected.

*Global statistics show automotive side-impact accidents are on the rise, accounting for approximately 30% of all collisions annually. The side of a vehicle offers the least protection to passengers.*

## DRAMATIC RESULTS FROM INDEPENDENT TESTING

DEKRA, an independent testing facility in Klettwitz, Germany, conducted testing to determine how LLumar safety and security film would perform in the event of a side-impact collision, when compared to an unprotected window. The results of these tests, shown above, were dramatic

## PROTECT YOURSELF AND YOUR FAMILY

Traffic accidents happen every day, even to the most responsible drivers. In a split second, lives can be changed. In a side-impact collision:

- Unprotected side windows can easily shatter, projecting glass shards into the car.
- Glass shards can cause significant lacerations and eye injuries.
- The opening from the shattered window increases the likelihood of passengers being thrown from the car – the leading cause of death in traffic accidents.

LLumar safety and security film provides a strong protective barrier between you and the glass in the event of an accident. With LLumar, the window may still break, but the glass fragments adhere to the film.

- Car occupants are shielded from dangerous flying glass shards.
- Passengers are protected from intruding accident debris.
- Flying glass is contained and does not interfere with side airbag performance.

Have confidence in LLumar's protection - every time your family is in your car.

## PROTECT YOUR VALUABLES

In less than five seconds, a thief can shatter your car window and rob you of your valuables. This can be particularly dangerous if you are in the vehicle during the attack.

LLumar safety and security film is the best defence against a "smash and grab" attack.

- By holding broken glass in place, LLumar slows access to the vehicle interior.
- The increased time to break-in and additional noise calls attention to the thief.
- If you are in the vehicle during an attack, you'll have more time to escape.

Don't be a victim! Protect your family, yourself and your valuables with LLumar.

## PROTECT YOUR INVESTMENT

The sun can present many dangers to you and your vehicle, such as distracting glare and harmful ultraviolet (UV) rays. UV rays penetrate glass and can cause your car's interior to fade, age and crack. These same UV rays pose a risk of skin cancer to you and your passengers.

When left in the sun, the inside of your car can rise to unbearable temperatures. The majority of heat build up is generated through unprotected glass. Running your engine to bring the temperature down to a comfortable level wastes expensive fuel and taxes the air conditioning system.

LLumar solar control safety film:

- Filters out distracting glare, providing a safer view of the road.
- Blocks up to 99% of damaging UV rays, keeping your car looking newer, longer.
- Reduces heat, creating a cooler, more comfortable environment for you and your passengers.

Trust LLumar to help shield you and your investment from the sun.
